Summary

Highly skilled Front End and Mobile App Developer specializing in React.js, Next.js, and React Native, with a strong background in Material UI. Graduated in 2023 with a BSc in Computer Science from Calicut University. Experienced in creating dynamic and responsive user interfaces, and adept at building high-quality web and mobile applications. Proven ability to collaborate effectively within team environments to deliver engaging and innovative digital solutions.

Projects

FurniQuest - E-commerce Platform

- Developed FurniQuest, a full-fledged e-commerce website for an online furniture store, using React.js and Commerce.js as the headless commerce platform. The project features dynamic product listings, a functional shopping cart, and a fully responsive user interface, ensuring a seamless and engaging shopping experience across all devices.

Netflix Clone with TMDB API

- Developed a Netflix clone using React Native, leveraging the TMDB API to fetch and display dynamic movie and TV show data. Implemented features such as user authentication, real-time data updates, and a responsive user interface to deliver a seamless streaming experience. Focused on optimizing performance and ensuring a visually engaging design consistent with the Netflix brand.

Fashion E-commerce Mobile App

- Created a sophisticated fashion e-commerce mobile application using React Native, integrating key libraries like React Navigation, Async Storage, and React Native Vector Icons to enhance functionality and user experience. The app boasts intuitive navigation, efficient data storage, and visually appealing design elements, ensuring a seamless and engaging shopping experience on both iOS and Android platforms. Demonstrated expertise in mobile app development, problem-solving, and the ability to deliver high-quality, user-centric applications within tight deadlines.

Skills

React Native, Next Js, ReactJS, Material Ui, AngularJS, Bootstrap, JavaScript, HTML, CSS, Git, Django, SCSS (Sassy Cascading Style Sheets), PostgreSQL, Python
