Project Detail

Federal Forecasting App

The Federal Forecasting Application is a platform that consolidates all of the government's future contracting opportunities and related information in one place, where you can easily discover, download, and access all government forecasts and related documents. .

Fastest Finger First

Quiz Management, Admin can schedule and manage quiz with category Participants can sign up with Email, Phone Number or Social media profiles. Participants can sign up for a Free / Paid quiz. Participants can choose a quiz category and challenge their friends for the quiz. Winner list generated when quiz ends. Every participant gets some amount in their wallet after the quiz ends. .

InDoctors

I led the development of "InDoctors," a sophisticated platform catering to three distinct user roles: patients, doctors, and hospitals. Patients can seamlessly book appointments with doctors, either at their clinics or the patient's address, providing flexibility and convenience. Doctors enjoy configurable settings, allowing them to accept home consultations and receive notifications of patient requests accordingly. .

Beauty Inkstitute

I spearheaded the development of "Beauty Inkstitute," a comprehensive web platform built on Laravel. This innovative project integrates video uploads, forum discussions, and assignment submissions, catering to a dynamic learning environment for beauty enthusiasts. Users benefit from multiple subscription options and a secure payment gateway, ensuring a secure transaction experience. .

Multi Vendor Food Delivery

A multi-vendor food delivery project typically involves creating a platform where multiple restaurants or food vendors can list their menus and customers can order food from various places through a single interface. The project usually includes features like user accounts, vendor dashboards, order management, payment processing, reviews/ratings, and often involves mobile apps for both customers and vendors. The goal is to streamline the process of ordering food from different eateries and providing a convenient experience for users..

Visaboard Web App

Visaboard Is A specializes in a product called Visaboard, which offers a B2B platform tailored for visa agents. This comprehensive platform boasts numerous features including role and permission management, robust reporting capabilities, graphical representations, CRUD operations, scheduled tasks (cron jobs), email delivery, and notifications. Leveraging AI technology, specifically ChatGPT, Visaboard facilitates the generation of Standard Operating Procedures (SOPs). Payment processing is seamlessly integrated using Paytm and Stripe. Additionally, Visaboard includes a community module, fostering a social platform for agents to network, advertise, and manage events. The product incorporates tools such as a cropper for image

manipulation and implements functionalities like autoscroll data loading, among many others..
