Technical Skills

Languages Java, JavaScript, Html/CSS.

Cloud (AWS) VPC, EC2, S3, IAM, LAMDA, CLOUD WATCH, SECURITY GROUP.

Tools / Libraries React.JS, Node, Express, MongoDB, Bootstrap, Tailwind, AWS, Firebase.

Experience

INFOSYS

Jun.2022 – Sep 2024

SYSTEMS ENGINEER

- Developed a React JS powered Leave Approval System, optimizing the user experience and reducing complexity by 30% through transitioning from class-based to functional components.
- Engineered advanced coding techniques including Memo, Callback and lazy loading usage, leading to a more efficient management of resources; this initiative resulted in a notable improvement in application speed, now supporting over 1,000 concurrent users effortlessly.
- Orchestrated AWS services (Lambda, CloudFormation, S3) to elevate system capabilities, ensuring scalability and reliability.
- Created global state management using Redux Slices, eliminating prop drilling, improving data control by 40%, and reducing state-related bugs by 35%.

Projects

Bloggy

Apr. 2021 - Apr 2021

MERN Stack (MongoDB, Express.js, React.js, Node.js)

[Live](#) | [Github](#)

- Launched Bloggie, a blog management system that features user authentication and unique email verification via MongoDB; system is now developed to support over 100 content creators, enhancing workflow efficiency and user satisfaction.
- Architected an efficient backend structure incorporating server routing and middleware, leading to a reduction in server load by 25%; enhanced user engagement with faster page load times and improved reliability.
- Created a robust commenting functionality with integrated like and dislike options for each user comment, fostering a sense of community and established to drive user engagement and registration growth.

Netflix-GPT

Mar. 2021 - Apr 2021

ReactJS, OpenAI, Firebase

[Live](#) | [Github](#)

- Build Netflix Clone Webapp integrated with Open AI GPT-3.5 for personalized movie recommendation based on user preferences.
- Designed and implemented a visually stunning Shimmer UI coupled with features like movies cards with vertically scrollable, trending movie preview and top-rated movies.
- Integrated Firebase user Authentication and Authorization fortifying project security measures.
- Utilized Redux toolkit for efficient data management and leveraged Tailwind CSS for responsive and modern styling.

YouTube

Jan. 2021 - Feb 2021

ReactJS, Redux Toolkit, Google API

[Live](#) | [Github](#)

- Crafted a vibrant YouTube clone utilizing the Google YouTube Videos API for Seamless content retrieval, dynamic playback and interactive navigation with react router.
- Engineered dynamic real time comments, auto deleting old ones, foresting vibrant community engagement.
- Optimized key featured like infinite scroll and debouncing in search leading to fewer API calls and enhanced overall performance.

Certifications

React web developer – Infosys (2023)

|| Node Associate – Infosys (2024)

|| DevOps Professional – Infosys (2023)

Namaste React – Namaste Dev (2024)

|| Metaverse Practitioner – Infosys (2023)

Education

BACHELOR OF ENGINEERING IN COMPUTER SCIENCE

Aug. 2017 - Sep 2021

MVJ College Of Engineering CGPA 7.1

INTERMEDIATE IN SCIENCE

Jun. 2015 – Jun 2017

Narayana College 93.7 %
